## **DETAILED ACTION**

### ***Response to Amendment***

1. The objection to the drawings is withdrawn in view of the amended drawings filed 06/14/05.
2. Applicant's arguments, in view of the amendments, filed 06/14/05, with respect to claims 1, 6, 8, 10 and 19 have been fully considered and are persuasive. The rejection of claims 1-19 has been withdrawn.

### ***Allowable Subject Matter***

3. Claims 1-19 are allowed.
4. The following is an examiner's statement of reasons for allowance:

Claim 1 states the combination of highlighting a first unit of source text based upon a first value of a source-unit start variable and a first variable of a source-unit end variable, allowing translated text to be inserted following the highlighted first unit, wherein the inserted translated text is a manual translation by a human language translator of the first unit of source text, performing a comparative statistical analysis between the inserted translated text and the first unit of source text and removing the highlighted first unit of source text after the insertion of the translated text.

Neumann (U.S. Pat. 5,303,151) teaches a computer-assisted method, apparatus and a computer readable medium for assisting a language translator, comprising:

highlighting an area of source text to be translated into a target language (emphasizes the source text by underlining it, col. 4, lines 33-37);

allowing insertion of text in the target language before the highlighted area of source text (inserts target language text at the insertion point which is prior to the source language text, Fig. 14B, element 1404);

allows a human user control over the translation of the highlighted source term (user chooses when and where to insert translations in the document, col. 7, lines 50-62); and

removing the highlighted area of source text after insertion of text in the target language (deletes underlined source text after translation, col. 16, lines 27-30 and Fig. 15B).

Neither Neumann nor any of the prior art on record teach highlighting the source text based upon a first value of a source unit start variable and a first value of a source-unit end variable and performing a comparative analysis between the highlighted first unit of source text and the inserted translated text. It would not have been obvious to one of ordinary skill in the art at the time of invention to modify the system of Neumann to arrive at the applicant's invention.

5. Independent claims 6, 8, 10 and 19 are allowed for the reasons given above in reference to claim 1.

6. Claims 2-5, 7, 9 and 11-18 are allowed for further limiting the subject matter to which they refer.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

Art Unit: 2655

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

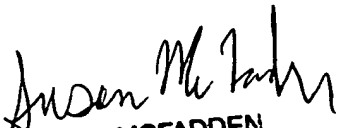

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Fuji (U.S. Pat. Pub. 2001/0047255A1) and Higinbotham (U.S. Pat. Pub. 0004702A1) teach highlighting text that needs to be translated.
